PROFESSIONAL SUMMARY

BS Cyber Security student passionate about Ethical Hacking, Penetration Testing, Red Teaming, Linux, Network Security, and Web Application Security. Continuously improving practical skills through hands-on labs, cybersecurity projects, and Capture The Flag (CTF) challenges, backed by completed training in cybersecurity fundamentals. Seeking an internship or entry-level role to apply and grow offensive security skills in a professional environment.

CAREER OBJECTIVE

To become a highly skilled Red Team Operator and Penetration Tester, helping organizations strengthen their security posture through ethical, authorized, and responsible security assessments.

EDUCATION

BS Cyber Security

Superior University · Expected Graduation: 2028

Relevant coursework: Network Security, Operating Systems, Applied Cryptography, Web Application Security, Digital Forensics.

TECHNICAL SKILLS

Operating Systems: Linux, Kali Linux

Networking: TCP/IP, DNS, HTTP/HTTPS, Network Security

Programming: Python, Bash

Cybersecurity: Ethical Hacking, Penetration Testing, Red Teaming, Web Application Security, OWASP Top 10, Vulnerability Assessment

Tools: Nmap, Burp Suite, Wireshark, Gobuster, Git, GitHub

Currently Learning: Metasploit, Splunk, Active Directory

PROJECTS

Personal Portfolio

Next.js, TypeScript, Tailwind CSS, Framer Motion

Performance-first personal portfolio website presenting cybersecurity work and projects.

Python Port Scanner

Python, Sockets, Threading

Multithreaded TCP port scanner with service detection and clean CLI output.

Network Scanner

Python, Scapy, ARP

Local network discovery tool that maps live hosts, open ports, and basic OS fingerprints.

Linux Notes

Markdown, Linux, Bash

Structured, growing knowledge base of Linux internals, hardening checklists, and command references.

Password Strength Checker

Python, Regex, HaveIBeenPwned API

Scores password strength against entropy, common patterns, and breach-list exposure.

Nmap Automation

Bash, Python, Nmap

Wrapper that chains Nmap scan profiles and auto-generates a readable recon report per target.

Log Analyzer

Python, Pandas, Regex

Log parsing utility that flags suspicious authentication attempts and attack signatures.

CERTIFICATIONS

Foundations of Cybersecurity

Google via Coursera · Completed December 2025

Cyber Security Training

Corvit Systems · September 2025 – November 2025 · Completed

Currently working toward: CompTIA Security+, Cisco Certified CyberOps Associate, Google Cybersecurity Professional Certificate, TryHackMe, Hack The Box, EC-Council CEH.
